 UT of Dadra & Nagar Haveli and Daman & Diu

Looking at the data and graph average of reasoning among selected candidates are quite high, while Arithmetic is just bellow at half way mark. Language proficiency is as good as total performance.

Comparison between top-average and bottom performers:

- While comparing Top performers with average performance and bottom performer is quite interesting. Those who are at the top they gain the most in Language. This gain is almost dabble then average and 4 time better then bottom 66.
- At the same time in reasoning, this ratio is not that much high between average performer and top performer (it is just 50% high). Of course, it is almost 4 time more then bottom performers.
- And in Arithmetic, even this difference is comparatively narrow. Top performers are less the dabble of average performers and they are not even 3 times of bottom performers.

Conclusion:

- Top performers are quite improved in language proficiency then other candidates.
- Reasoning is comparatively good to score for everyone.
- Arithmetic is quite worrisome and need to take care off.
